

SIGERSHADERS™

Material Pack 0001

WOOD MOSAIC

This collection contains 4 materials of wood mosaic.
Every mosaic material comes with three or more color variations and four finishes: Raw, Oiled or Hardwaxed, Semi-Gloss varnish and Gloss varnish.
56 advanced material setups with anisotropy, shallow angle reflections, accurate varnish layer model in total.

For custom color variations collection includes diffuse maps in uncompressed PNG format.
You may use these to create your own color variations without having to worry about compression artifacts of JPEG files.

Beside several color variations, each material texture consists of maps containing information to surface normals, surface height, reflectivity and anisotropy. Normal, bump, specular maps are essential to be able to achieve photoreal and authentic render results.

Wood Mosaic JAZZ

Map Channel	Bit Depth	Gamma
Diffuse (Color)	8 bit	2.2
Specularity / Glossiness	8 bit	2.2 / 1.0
Bump	8 bit	1.0
Normals	24 bit	1.0
Anisotropy Angle	8 bit	Default Gamma

Real Size: 162cm x 140.3cm | Pixel Size: 9288px x 8044px
Seamless: H / V
