

SIGERSHADERS™

Material Pack 0002

PARQUET

This pack contains 4 complex material sets of Parquet.

Some parquet material comes with three or more color variations and four finishes: Raw, Oiled or Hardwax, Semi-Gloss varnish and Gloss varnish.

Advanced material setups with anisotropy, shallow angle reflections, accurate varnish layer model - 48 materials in total.

For custom color variations collection includes diffuse maps in uncompressed PNG format.

You may use these to create your own color variations without having to worry about compression artifacts of JPEG files.

Beside several color variations, each material texture consists of maps containing information to surface normals, surface height, reflectivity and anisotropy. Normal, bump, specular maps are essential to be able to achieve photo-real and authentic render results.

Pack includes ready-to-use material setups for Corona Renderer, V-Ray (both for 3ds Max 2016+).

Parquet ARTDECO

Real Size: 320 cm x 320 cm
Pixel Size: 12000 px x 12000 px
Seamless: H / V

Map Channel	Bit Depth
-------------	-----------

Diffuse (Color)	8 bit
Specularity	8 bit
Glossiness	8 bit
Bump	8 bit
Normals	24 bit
Anisotropy Angle	8 bit
